Contacts list & details

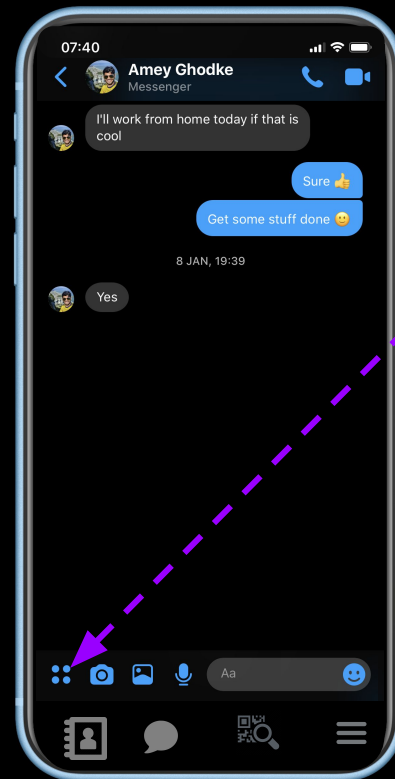

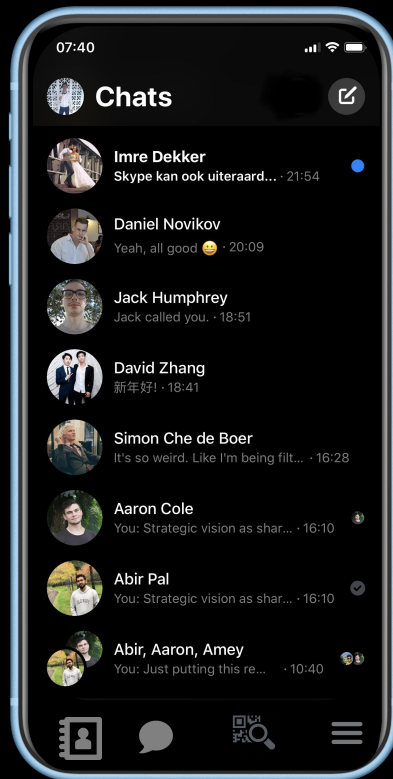

The icon should become white when the user is on that page. As I couldn't find editable icons this is not reflected in these wireframes.

Shouldn't look this cramped, I've just put it here because I can't show how it looks to scroll down.

Probably better to replicate the layout in the upper area, and make the logos grey if they are not shared with the other person.

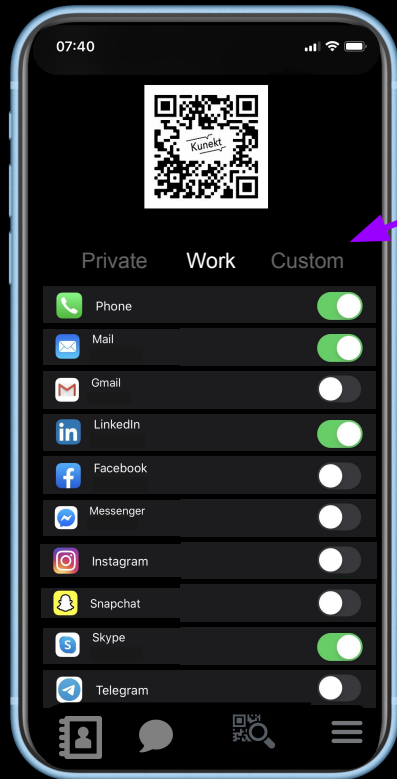

Chat

Menu shows to all items that other platforms offer (iMessage, Messenger, Whatsapp, Telegram)

Not needed in early versions. Just text is fine, and we'll work up to calling, pictures, GIFs etc.

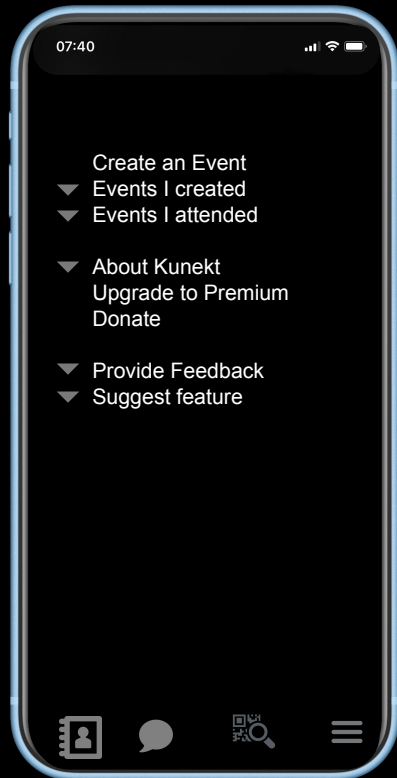

Sharing your details

The user can pre-define multiple settings. This way the user has a pre-defined setting for informal events and professional events. The QR code changes when clicking on another profile.

No need to build the QR code generator yet. Just build that the user can make 3 distinct profiles using the toggle on-off buttons.

Menu

What each item does:

Create an Event: links to app.kunekt.co (in a browser, will be in-app later on)

Events I attended: This component is yet to be created by the team. Leave out for now

Events I created: This component is yet to be created by the team. Leave out for now

Upgrade to Premium: This is yet to be created by the team. Leave out for now
